

Examination questions: Safety for Operational Supervisors

Event code: mock examination

Please read the following instructions carefully!

This examination is comprised of **70** multiple-choice questions.

Each question is followed by three possible answers, of which only one is correct.

A maximum of **70** marks can be scored in this examination. Every correct answer scores 1 mark.

You will have passed when you score at least **49** marks.

The maximum time for this examination is **105** minutes.

Requirements:

- these examination questions
- the answer sheet (used to note your answers)
- a pencil and eraser

Directions:

- make sure that you have all the pages in these examination questions
- only use a pencil to enter your answers on the answer sheet
- note your answers under the corresponding question numbers on the answer sheet
- indicate your answer by using your pencil to blacken the appropriate square
- always thoroughly erase any incorrectly entered answer

A multiple-choice question will be regarded as incorrectly answered when:

- the wrong answer has been chosen
- more than one square has been blackened
- no square has been blackened
- a square has not been blackened, but has been marked in some other way

At the end of the examination:

- write or check your name on the answer sheet
- give the supervisor these examination questions and the answer sheet

In the event of any differences in interpretation the original Dutch version of this examination is binding.

1 What is the objective of the Chemical Substances Act?

- A To reduce and segregate the various types of waste.
- B To protect humans and the environment from hazardous substances.
- C To make employers environmentally conscious.

2 Some employees in a company are refusing to wear personal protective equipment. What can the Labour Inspectorate do in this case?

- A The Labour Inspectorate can require the employees to take an obligatory course.
- B The Labour Inspectorate can draw up an official report and stop the work.
- C The Labour Inspectorate may give a warning.

3 When different employers are working on the same site, what does the Working Conditions Act (Arboret) say they must cooperate on?

- A Environmental management and waste disposal.
- B The provision of personal protective equipment and the organisation of an in-house emergency team.
- C Health and safety.

4 A claw hammer falls off a scaffold under construction, and hits the head of a passer-by. The passer-by suffers from a resultant head injury. Which of the following statements is then correct?

- A The liability lies with the party that made the mistake, in this instance the person who dropped the hammer.
- B The passer-by is liable, since the passer-by should have realized that it is dangerous to walk past a scaffold whilst it is under construction.
- C The company carrying out the work is liable, passers-by should also be protected.

5 Which countries are bound by the European working-conditions directives?

- A All EU member states.
- B All European countries.
- C All European companies affiliated with the ADR.

6 An employee is welding without welding goggles. How do we refer to this?

- A A dangerous act.
- B An acceptable risk.
- C A dangerous situation.

7 What is a Task Risk Analysis (TRA)?

- A A written analysis of risks that can occur while performing risky tasks.
- B A written evaluation of the tasks described in the Risk Analysis (RA).
- C A written summary of tasks that can cause risks in a company.

8 What is the effect of excessive noise in the workplace?

- A Workmates or people living in the neighbourhood might complain.
- B More work gets done because it's too noisy to talk to one another.
- C It increases the level of risk in the workplace.

9 A task risk analysis has been carried out. The situation has since changed. What action should now be taken?

- A Immediate adjustment of the task risk analysis.
- B Evaluation of the task risk analysis in the toolbox meeting.
- C Adjustment of the task risk analysis after the project.

10 Which of the following is part of the technical work preparations?

- A The determination of the evacuation routes.
- B The determination of the materials, tools and machines needed for the job.
- C The specification of the safest working procedure.

11 What must an employee do when there has been an accident without serious injury?

- A Report the accident to the Labour Inspectorate.
- B Report the accident to the company first-aid staff.
- C Report the accident to the immediate supervisor.

12 How can a company make sure its machines are technically safe?

- A By having regular technical checks done.
- B By having a pair of safety glasses next to each machine.
- C By making sure the workplace is kept neat and tidy.

13 What preventative steps can an employee take to avoid an accident?

- A They need to have sufficient skills to be able to perform their work safely.
- B They need to make sure their tools are properly maintained.
- C They need to use the appropriate working methods.

14 Which of these should always be part of an accident investigation?

- A Filling in an accident report form and sending it to the insurance company.
- B Immediately clearing up the tools that were used.
- C Interviewing the victim and witnesses as soon as possible after the accident.

15 What is important to remember to do when performing an investigation into an accident?

- A Send the results to the Labour Inspectorate.
- B Record the situation in situ with sketches and drawings.
- C Discuss the final report with the site owner.

16 Which of these is the best safety measure?

- A Keep the workplace tidy and keep access routes free.
- B Mark all hazards in the workplace with a red and yellow tape.
- C Sort out all the waste produced into different types immediately.

17 How can the risk of tripping or slipping at the workplace be removed at the source?

- A By always keeping the workplace clean, well ordered and tidy.
- B By cordoning-off the area with a yellow and red warning ribbon.
- C By placing warning signs around the work area.

18 What increases the risk of an employee not enjoying their work?

- A An inconsistent work instruction.
- B A complete work instruction.
- C Good working arrangements.

19 How can we encourage safe conduct?

- A By emphasising the success of safe conduct.
- B By limiting the opportunities for unsafe conduct.
- C By emphasising the consequences of unsafe conduct.

20 Why are safety observations carried out at the workplace?

- A Because the Arboret (Working Conditions Act) prescribes the performance of safety observations by all companies.
- B Because it gives a good insight into the safety conditions at the workplace.
- C Because it is required by the arbeidsinspectie (Health and Safety Inspectorate) following an accident.

21 Which important employees' right is contained in the Working Conditions Act (Arboret)?

- A The right to compliance with the Collective Labour Agreement (CAO).
- B The right to stop work if there is a hazardous situation.
- C The right to keep quiet about incriminating facts after an accident.

22 Which of the following is under the obligation to carry out an inventory of the risks at the workplace?

- A The certified arbodienst (Occupational Health and Safety Service).
- B The employer.
- C The employer and the employees.

23 What, pursuant to the Arboret (Working Conditions Act) is compulsory with respect to the provision of instructions and information?

- A The instructions and information must be tailored to the employees' specific duties.
- B Instructions and information must be given by an Arbo (working conditions) expert.
- C Instructions and information must be provided in the form of written documentation.

24 What is a toolbox meeting?

- A A meeting in which information about a new project is provided.
- B A short meeting at the workplace addressing safety issues.
- C A short meeting about the work assignments.

25 What does SCC certification indicate about a company?

- A It indicates that the company works on SHE management in accordance with the regulations.
- B It indicates that the company complies with the safety-control system by means of safety-observation reports.
- C It indicates that the company registers dangerous situations, and has them certified.

26 When do special safety regulations apply?

- A When the work to be done is not subject to any legal safety regulations.
- B When the work to be done involves increased risks.
- C When the company has no general safety regulations.

27 In which situation would you use a blind flange?

- A When checking the contents of a tank via a sampling point.
- B To prevent internal contamination when transporting new pipes.
- C To shut off the supply lines when working in a confined space.

28 What is one of the aims of a work permit?

- A To integrate newcomers to the Netherlands.
- B To make binding work agreements.
- C To set up safety procedures.

29

What does this sign mean?

- A Hearing protection is compulsory when entering this area.
- B Hearing protection only has to be worn when working.
- C Hearing protection is recommended.

30

What is the main safety consideration when a dangerous situation is cordoned off.

- A The reason for the cordoning off should be announced.
- B The cordoning off should be done in red, white and blue.
- C The cordoning off should be clearly visible.

31

When does a work permit come into effect?

- A When all the prescribed measures have been taken.
- B When it has been signed for approval.
- C When everyone has been instructed about the safety measures.

32

What are the various phases involved in the control and resolution of an incident?

- A The initial notification of the incident, the installation of crowd barriers, the notification of the fire brigade, and the termination of the incident.
- B The initial notification of the incident, the implementation of measures, and the termination of the incident by means of an aural signal.
- C The initial notification of the incident, the classification of the incident, the implementation of measures, and the termination of the incident.

33

What is the purpose of a company emergency plan?

- A To manage the consequences of a possible disaster.
- B To prevent fire and accidents.
- C To ensure a safe working environment.

34 What safety measure should an employee take if he is working in a space where the air contains less oxygen than normal?

- A He should first see if he can work there without any breathing protection equipment.
- B He should wear a mask with a filter unit.
- C He should wear independent breathing protection.

35 What important condition applies to threshold values (MAC values)?

- A People must not work more than 8 hours a day.
- B People should never work when a MAC value is indicated.
- C People may work more than 8 hours a day.

36 What information do the 'S' sentences on a hazardous substance label give you?

- A Information on the standards the product must meet.
- B Information on the safety measures you must take.
- C Information on examining and selecting the substance.

37 What kind of effects can biological substances have on humans?

- A Biological substances can cause allergies.
- B Biological substances always cause headaches.
- C Biological substances are never harmful to humans.

38 What is the best way of protecting yourself from exposure to hazardous substances?

- A Removing the risk at source.
- B Breathing protection.
- C Evacuation.

39 The white section of a hazard diamond is empty. What does this mean?

- A That, in case of calamities, this substance does not require special treatment.
- B That the product is not dangerous to your health.
- C That the product is radioactive.

40 What can be one health consequence of working with asbestos?

- A Leukaemia.
- B Pulmonary embolism.
- C Lung cancer.

41 A fire extinguisher is labelled with the B/C fire-class letters. Which fires can be extinguished with it?

- A Liquid and gas fires.
- B Gases and metal fires.
- C Liquid and metal fires.

42 An evacuation has started in a building. Are you allowed to use the lift?

- A Yes, but only the fire brigade lift.
- B Yes, but only in high buildings.
- C No, this is not allowed.

43 What does this sign warn about?

- A An explosive mixture.
- B An area with an explosion hazard.
- C An explosive substance.

44 In a fire, what does a catalyst affect?

- A The speed of combustion.
- B The flash point of a liquid.
- C How much smoke a fire produces.

45 A fire starts during the activities. According to the hot work permit, what does the hot work watch do first?

- A Make notes on the hot work permit.
- B Phone the fire service.
- C Try to extinguish the fire.

46 In which zone is an explosive gas mixture most likely to be present?

- A In zone 0.
- B In zone 21.
- C In zone 2.

47 What must you do before carrying out maintenance work on a machine?

- A Switch the machine off.
- B Tell your workmates about the maintenance work to be done.
- C Make sure there is supervision if the machine remains in operation.

48 What must a hand-held grinder be fitted with?

- A A guard around the grinding disc.
- B A speed limiter.
- C An earthed plug.

49 When should lifting work be stopped?

- A From wind-force 4.
- B From wind-force 5.
- C From wind-force 6.

50 Which of the following is an item of hoisting equipment?

- A A fork-lift truck.
- B A hoisting beam.
- C A winch.

51

Which of these is a non-powered piece of lifting equipment?

- A A hoisting bucket.
- B A gantry crane.
- C A tackle.

52

Which of the following requirements must be met by hand-held grinders?

- A Hand-held grinders must be fitted with a power cable at least 4 metres long.
- B Hand-held grinders must be fitted with a sound absorber.
- C Hand-held grinders must be fitted with a dead man's button.

53

What radiation is released during electric welding which is extremely harmful to the eyes?

- A Beta radiation.
- B Gamma radiation.
- C Ultraviolet radiation.

54

What hazard could demolition work cause?

- A There could be inadequate natural ventilation.
- B You could get trapped between moving parts.
- C You could walk into protruding structural components.

55

What is the best safeguard to use for an opening in the floor?

- A The floor opening should be covered with a strong material.
- B The floor opening should be well lit.
- C Sufficient warning signs should be placed around the floor opening.

56

You are doing some excavation work. In which situation do you excavate carefully?

- A When you are using a toothed excavator bucket.
- B When you are digging on the instructions of the Labour Inspectorate.
- C When you are digging test trenches.

57

Which of these can reduce the danger of falling when working on a flat roof?

- A Roof edge protection.
- B A safety harness.
- C Walk boards and safety nets.

58

What requirement must be met before you enter a confined space?

- A The safety expert must be informed.
- B A production worker must be present.
- C A safety officer (manhole guard) must be present.

59

If you are an earth mover, which of the following are you required to report to KLIC/Land registry?

- A Excavations up to a depth of 50 centimetres.
- B Discussions between cable and pipeline management bodies.
- C The presence of an unknown cable or pipe (orphan line).

60

What affects the strength of an electric current flowing through the body?

- A Length of contact.
- B Body temperature.
- C Ground resistance.

61

What measure can we take against electrocution?

- A Wear an approved overall.
- B Use very low voltage.
- C Use non-sparking tools.

62

How can you prevent static electricity in a tank of liquid?

- A Add antistatic dope to the liquid.
- B Increase the speed of the liquid when pumping it around.
- C Use non-conductive packing in the piping system.

63 Which of the following has an influence on the injuries caused by electric current through the human body?

- A The time the current flows through the body.
- B The person's sex.
- C The fabric used to make the person's clothes.

64 What can excessive noise cause?

- A Permanent hearing loss.
- B Chronic headache.
- C Inflammation of the middle ear.

65 What is the consequence of vibrations felt in the hands and arms?

- A Stomach and intestinal complaints.
- B Inflammation of the shoulders.
- C What are referred to as "white fingers".

66 Good sitting posture at work depends mainly on what?

- A The seat should support the upper legs.
- B An expert should check that the chair is properly adjusted.
- C The feet should take 60% of the body weight.

67 What should you check before using personal protective equipment?

- A It must be approved by the Labour Inspectorate.
- B It must have the name of the supplier on it.
- C It must have the CE mark on it.

68 When should you wear goggles?

- A When connecting and disconnecting product hoses.
- B When engaged in autogenous welding.
- C When grinding, breaking and drilling.

69

Why may metal hard hats not be used in industry?

- A Because a metal hard hat can cause head injuries.
- B Because metal hard hats are insufficiently able to absorb the force of a falling object.
- C Because a metal hard hat can conduct electricity.

70

Which safety shoes requirement is important to prevent slipping?

- A A corrosion-proof heel tread.
- B A good tread in the sole.
- C A steel toecap tread.
